Juheeshwari Rajmohan

Full Stack Web Developer

Results-driven Full-stack Web Developer with over 8 years of expertise in designing and implementing scalable web applications. Proficient in both frontend and backend technologies, with a strong foundation in web development, and extensive experience with frameworks. Adept at collaborating with cross-functional teams to deliver high-quality, user centric solutions.

WORK EXPERIENCE

i911 (March 2021 – Present)
Lead Software Engineer (Remote)

- **Led the implementation of a customer dashboard using React, enhancing the overall user experience and reducing load times by 20%.**
- **Spearheaded the migration of a legacy frontend to Angular for our main website, resulting in a more modular and maintainable codebase**
- **Developed major frontend features for our fitness/gaming mobile application that allows users to track their fitness/outdoor activities and use different AR avatar filters as part of their journey experience using UNITY.**
- **Achieved a major milestone by refactoring the DEPRECATED code issue caused by the old version and a new version of Unity and XCode frameworks.**
- **Developed, and deployed the mobile applications using AWS services such as EC2, S3 and Django.**

University of Southern California (September 2018 – March 2021)
Senior Web Developer, Los Angeles, CA

- **Developed, documented and maintained full-stack web applications in technologies like Golang with Iris, Gorilla Mux Framework, PHP, WordPress, HTML, CSS, JavaScript, jQuery, AngularJS, and ReactJS for web development.**
- **Spearheaded transitions from WordPress, PHP sites to modern stack, reducing the latency by 35% and increasing database effectiveness by 70%.**
- **Developed and implemented Admin portal in Golang which directly helps HR department and communication manager to upload/edit or delete the content to the LIVE site with database connection.**
- **Maintained the CI/CD pipelines with AWS services and created Jenkins jobs to updating puppet at the master/slave.**
- **Followed AGILE Methodology for the software development process, part of the cross-functional team for the application development.**
- **Ensure applications security and ability to interact with multiple APIs and databases.**

JLL (May 2018- September 2018)
Programmer Analyst, Los Angeles, CA

- **Developed and executed research projects using PHP, MySQL, and Tableau.**
- **Maintained the production of data management, data integration processes.**
- **Developed and implemented a new scripting program with Python, SQL, and excel to save manual labor for real estate data entry and finding duplicates which boosted the performance by 65% saving over 50 hours of work.**
- **Participated in the design and development of technical solutions to ensure that business requirements are satisfied.**
